Reading the scenarios

Scenario results compare workforce profiles on the same activities, calendar and norms. They are not an industry benchmark; a doubled workforce does not halve the programme because of dependencies, finite work fronts, shared equipment and rounding of crews.

Assumptions, exclusions and limitations

- Quantities are human-measured BOQ quantities; the application does not measure drawings.
- Figures are taken from frozen estimate version v2 (fingerprint 48d0f9242dc910b7).
- SYNTHETIC / DEMONSTRATION data: rates, quotations, productivity norms, customer and responses are fictional test inputs, not market evidence.
- Workforce bands are configurable company planning assumptions, not industry-standard categories.
